

Quality Policy Statement

Storengy UK Ltd considers Quality to be a key part of our delivery and it underpins what we do. It is the policy of the business that all our activities are carried out in accordance with the requirements laid out in our Integrated Management System (IMS). We are serious about doing things properly and continually improving the way we work to provide the best operational performance and service for our customers.

Storengy's IMS provides a collaborative framework for our strategic direction, allowed everyone in our business to access the right documentation, policies, and processes. Supporting the delivery of our targets and objectives.

Senior Management supports the implementation and review of our processes to ensure they continue to meet the needs of our business and our stakeholders; this includes all regulatory and statutory requirements.

Storengy recognises that our people are an integral part of our success and will therefore ensure they are trained, equipped and empowered to maintain and exceed our expectations in delivering a quality service and operation.

Storengy recognise that culture plays an important part in delivering against plans, objectives, and targets. The senior management will work to engender a positive culture where the principles of quality management are embedded in the day-to-day operation of the organisation.

We are passionate about our Responsible Business aims, and how we maximise the social and economic benefits wherever we work, this is why we work closely with our local communities. We expect the same of our supply chain, and only use Storengy selected, approved, preferred, or certified suppliers.

Through a process of audit and review, including Leadership Safety Visits (LSV), Managerial Safety Visits (MSV) and internal auditing, we ensure that our IMS is effective and continues to meet the needs of the business. We also ensure non-conformances are fully documented to ensure we understand the root cause and that we learn from corrective actions. This allows for collaboration, sharing of best practices and innovation in order to promote continuous improvement within the business.

This policy is reviewed annually to ensure it remains fit for purpose, meets our business needs and aligns with our strategy and objectives.

We ensure this policy is cascaded to all employees throughout the business and is available upon request for interested parties.
